Project Requirements available at: ADD GIT LINK HERE

Criteria		Evaluation	Comments (Optional)
Technical Requirements - MVP *If more than two items are marked "no" in this section, this section will be considered a failure. If two or fewer items are marked "no", it is considered passed. Your game must fulfill the requirements listed below.*			
1.1	Render the game in the browser using the DOM manipulation techniques demonstrated in lecture (refer to rock-paper-scissors)	CHOOSE ONE	
1.2	Include win/loss logic and render win/loss messages in HTML. The game you chose must have a win/lose condition.	CHOOSE ONE	
1.3	Include separate HTML, CSS, JavaScript, and JavaScript data files organized in an appropriate file structure.	CHOOSE ONE	
1.4	Include all required features specific to your game as defined in the **Required** Features column in the table in the **Recommended** games document, or as discussed with your instructor if doing a custom game.	CHOOSE ONE	
1.5	(Optional) The game is deployed online so the rest of the world can play it.	CHOOSE ONE	
Code Convention Requirements *If more than two items are marked "no" in this section, this section will be considered a failure. If two or fewer items are marked "no", it is considered passed. Your game must fulfill the requirements listed below.*			
2.1	The game can be played without encountering errors. No errors may be present in the console in the browser.	CHOOSE ONE	
2.2	The code in the app adheres to coding conventions covered in lessons, like using plural names for arrays.	CHOOSE ONE	
2.3	There is no remaining dead and/or commented out code or console logs outside of a commented out Code Graveyard section of your code.	CHOOSE ONE	
2.4	The game may not utilize the `prompt()` or `alert()` methods.	CHOOSE ONE	
2.5	The game is coded using proper indentation.	CHOOSE ONE	
Code Understanding Requirements If any item is marked "no" in this section, this section will be considered a failure. The presenter must fulfill the requirements listed below.			
2.6	Explain (correctly) their codes when asked questions during the soft launch/check-in, pre and post presentation.	CHOOSE ONE	
2.7	Explain the conceptual understanding of their codes, e.g. why they used a certain package, why they wrote the codes a certain way and not another.	CHOOSE ONE	
UI/UX Requirements *If more than two items are marked "no" in this section, this section will be considered a failure. If two or fewer items are marked "no", it is considered passed. Your game must fulfill the requirements listed below.*			
3.1	CSS Flexbox and/or Grid and/or CSS framework is used for page layout design.	CHOOSE ONE	

3.2	Instructions about how to play the game are included in your app.	CHOOSE ONE	
3.3	Colors used on the site have appropriate contrast that meet the WCAG 2.0 level AA standard.	CHOOSE ONE	
3.4	All images on the site have alt text.	CHOOSE ONE	
3.5	No text is placed on top of an image in a way that makes that text inaccessible.	CHOOSE ONE	
Git and GitHub Requirements *If any item is marked "no" in this section, this section will be considered a failure. Your interactions with Git and GitHub must fulfill the below requirements.*			
4.1	You are shown as the only contributor to the project on GitHub.	CHOOSE ONE	
4.2	The GitHub repository used for the project is named appropriately. For example, names like connect-four or adventure-game are appropriate names, whereas game-project or ga-project are not. The repo must be publicly accessible.	CHOOSE ONE	
4.3	Frequent commits dating back to the very beginning of the project. If you start over with a new repo, do not delete the old one.	CHOOSE ONE	
4.4	Commit messages should be descriptive of the work done in the commit.	CHOOSE ONE	
README Requirements *If more than two items are marked "no" in this section, this section will be considered a failure. If two or fewer items are marked "no", it is considered passed. Your README must contain the items or sections below.*			
5.1	Screenshot/Logo: A screenshot of your app or a logo.	CHOOSE ONE	
5.2	Your game's name: Include a description of your game and what it does. Background info about the game and why you chose it is a nice touch.	CHOOSE ONE	
5.3	Getting started: Include a link to your deployed game and any instructions you deem important. This should also contain a link to your planning materials.	CHOOSE ONE	
5.4	Attributions: This section should include links to any external resources (such as libraries or assets) or AI/LLM questions you used to develop your application that require attribution. You can exclude this section if it does not apply to your application.	CHOOSE ONE	
5.5	Technologies Used: List of the technologies used, for example: JavaScript, HTML, CSS, etc.	CHOOSE ONE	
5.6	Next steps: Planned future enhancements (stretch goals).	CHOOSE ONE	
Presentation Requirements *If any item is marked "no" in this section, this section will be considered a failure. Your presentation must fulfill the below requirements.*			
6.1	Present your project in front of the class on the scheduled presentation day.	CHOOSE ONE	
6.2	The project you present is the project you were approved by your instructor to build.	CHOOSE ONE	
Summary			
The Project meets the minimum requirements and passes.		CHOOSE ONE
